Work Experience

Web Software Developer   **PLN Icon Plus**   **Oct 2022–Present**

Jakarta, Indonesia

PLN Icon Plus (ICON+) is a subholding of State Electricity Company (PLN) Indonesia, specializing in telecommunications networks, software development, and information technology services.

- Developed a Software as a Service (SaaS) tax accounting product seamlessly integrated directly with Tax Directorate General (DJP) Indonesia, handling an average of 23,000 transactions monthly with total transactions of up to 600 billion IDR, and used by 1500+ daily active users nationwide.
- Maintained web systems and codebases by collaborating with the sysadmin teams to ensure proper optimization and functionality. Managed to reduce network bottleneck, resulting in the prevention of potential losses totaling up to 1 billion IDR for the company.
- Delivered several new major features and services for web products within the timeline, increasing in user feedback scores.
- Successfully integrated and optimized third-party APIs, enabling real-time data synchronization and improving user experiences.

Front End Developer   **Cipta Kreasi**   **Nov 2020–Oct 2022**

Jakarta, Indonesia

Cipta Kreasi is an agency providing digital marketing services along with software development solutions.

- Developed 10 SEO-optimized and search engine-friendly landing pages, resulting in a 124% increase in organic search traffic.
- Built 3 internal dashboards and visualization tools for analytical and performance web reports using Laravel, increasing the performance and work efficiency of the SEO Team by 92.5%.
- Implemented various page optimization strategies including lazy loading, tree shaking, file minification, caching, and preload, resulting in a 78.57% improvement in page load times.

Junior Front End Developer   **Tebuireng Telecom**   **May 2019–Aug 2020**

Jakarta, Indonesia

- Resolved 50+ front-end issues and bugs, resulting in an 80% reduction in user tickets and an improvement in user experience.
- Assisted in developing 30+ front-end pages according to client requests and requirements, resulting in a reduction in project iterations, saving time and resources.
